with over one billion people worldwide living in informal settlements and enduring substandard housing conditions these areas present one of the greatest urban challenges of our time the existence of informal settlements is deeply intertwined with global issues such as climate change war induced displacement and colonialism as sustainability becomes a central focus in various disciplines including architecture the path to sustainable urban development lies in addressing the problems of informal settlements architecture's relevance to this discourse is paradoxically highlighted by its perceived irrelevance informal settlements are often overlooked as legitimate sites for architectural practice this neglect stems from two assumptions first architecture's traditional dependence on power and capital isolating the marginalised who rarely have the chance to receive architectural services and second architecture's perceived incapability to address urban scale infrastructural problems and thereby its reduction to aesthetic creativity and form making this book challenges architecture's focus on the centre and its lack of ambition for creating a pervasive impact on cities instead it highlights the profession's potential to serve the common good and address urban scale infrastructural issues and proposes the effective engagement of architects in informal settlements drawing on henri lefebvre's dichotomy of margin versus centre in urban spaces informal settlements are interpreted as spaces on the city's periphery created by the marginalised with limited access to power capital and authority by revisiting interrelated concepts such as the production of space the right to the city social architecture and spatial agency

within the context of informal settlements the book claims a space for architectural practice in these areas it incorporates discussions on insurgent citizenship and critiques of the self help approach contextualising its arguments with architectural intervention precedents from around the world the book concludes with a brief manifesto on practising architecture in informal settlements the book aspires to inspire architecture students practitioners and researchers to explore the profession s potential in social problem solving and to push the boundaries of practice towards inclusiveness for all urban inhabitants

why architects matter examines the key role of research led ethical architects in promoting wellbeing sustainability and innovation it argues that the profession needs to be clear about what it knows and the value of what it knows if it is to work successfully with others without this clarity the marginalization of architects from the production of the built environment will continue preventing clients businesses and society from getting the buildings that they need the book offers a strategy for the development of a twenty first century knowledge led built environment including tools to help evidence develop and communicate that value to those outside the field knowing how to demonstrate the impact and value of their work will strengthen practitioners ability to pitch for work and access new funding streams this is particularly important at a time of global economic downturn with ever greater competition for contracts and funds driving down fees and making it imperative to prove value at every level why architects matter straddles the spheres of practice management and law history and theory design housing sustainability health marketing and advice for clients bringing them into an accessible whole the book will therefore be of interest to professional architects architecture students and anyone with an interest in our built environment and the role of professionals within it

design intervention toward a more humane architecture first published in 1991 intends to demonstrate that interest in social issues is alive and well in architecture that there is a small but effective cadre of dedicated professionals who continue to commit themselves to solving social problems and that architecture is being applied to the alleviation of the social ills of our time the editors and contributors in this book have all grappled with their own definitions of design innovation and express in practical and useful ways their ideas for contributing to a better and less needy world through the architecture they describe this book will be of interest to students of architecture
